| Concentration:           |                                                                                                                                                                |
| Formulation:             | Lyophilized                                                                                                                                                    |
| Reconstitution:          | Reconstitute in 10 mM HEPES buffered saline, 0.1 mM CaCl <sub>2</sub> , pH 7.5 – 8.5. For preserving solutions stored at 4 °C, 0.08% sodium azide can be used. |
| Storage Conditions:      | Store at 2-8°C                                                                                                                                                 |
| Analysis:                | 036253                                                                                                                                                         |
