SECTION 4: First aid measures

4.1 Description of first aid measures

General advice

Consult a physician. Show this material safety data sheet to the doctor in attendance.

If inhaled

First aid practitioner: confirm your own safety! After inhalation: move the injured to fresh air. If breathing stops, give mouth-to-mouth artificial respiration immediately. If necessary, use oxygen mask. Seek medical attention immediately.

In case of skin contact

In case of skin contact: immediately remove/take off all contaminated clothes. Wash skin/shower with water. Ask a doctor.

In case of eye contact

After eye contact: wash with plenty of water. Contact an ophthalmologist. Remove contact lenses.

If swallowed

After swallowing: let the injured drink water (up to 2 cups) immediately. Consult a doctor.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

no data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Foamed carbon dioxide (CO₂) dry powder

Unsuitable extinguishing media

For this substance/mixture no limitations of extinguishing agents are given.

5.2 Special hazards arising from the substance or mixture

Carbon oxides and nitrogen oxides are flammable. Be careful of tempering. Steam is heavier than air, so it can spread along the ground. Hazardous gas or vapor may be generated during fire. it forms explosive mixture with air at mild

temperature

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

Use water spray to cool unopened containers.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

It is recommended for non-emergency personnel not to inhale steam and aerosol. Avoid material contact. Ensure adequate ventilation. Keep away from heat and fire sources. Disperse dangerous areas, observe emergency procedures, and solicit expert opinions. See section 8 for personal protection.

6.2 Environmental precautions

Don't let products enter the sewer. Risk of explosion.

6.3 Methods and materials for containment and cleaning up

Cover the sewer. Collect, contain and pump out leakage. Observe the material restrictions that may apply (see Sections 7 and 10). Absorb with liquid absorbing materials, and treat with chemical wastes. Clean the affected areas.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Operate under a fume hood. Do not inhale substances/mixtures. Avoid generating steam or smoke. Keep away from open flames, hot surfaces and ignition sources. Take measures to prevent electrostatic discharge. Change contaminated clothes immediately. Use skin protection lotion. Wash your hands and face after using this substance. Please refer to Section 2.2 for preventive measures.

7.2 Conditions for safe storage, including any incompatibilities

Keep the container closed and store it in a dry and ventilated place. Keep away from heat and fire sources. Recommended storage temperature-20 C

7.3 Specific end use(s)

no data available

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

ALADDIN SCIENTIFIC CORPORATION
 14078 Meridian Parkway, Riverside, CA. 92518

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. The selected protective gloves have to satisfy the specifications of Regulation (EU) 2016/425 and the standard EN 374 derived from it.

Body Protection

Impervious clothing, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a fullface respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

If safety requires, prevent further leakage or spillage. Do not let the product enter the sewer.
