SECTION 6: Accidental release measures**6.1 Personal precautions, protective equipment and emergency procedures**

Ensure sufficient ventilation. Use personal protective equipment Avoid the formation of dust

6.2 Environmental precautions

Prevent entry into waterways, sewers, basements, or enclosed areas. Do not flush into surface water or sewage discharge systems. For more ecological information, please refer to Part 12.

6.3 Methods and materials for containment and cleaning up

The containment method prevents further leakage or overflow when it is safe and feasible. The cleaning method is to use personal protective equipment as required. Cover the leaked powder with plastic or waterproof cloth to minimize dispersion and keep the powder dry. Mechanically pick up and place in a suitable container for disposal. Avoid the formation of dust. Thoroughly clean contaminated surfaces.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. The selected protective gloves have to satisfy the specifications of Regulation (EU)2016/425 and the standard EN 374 derived from it.

Body Protection

Complete suit protecting against chemicals, Flame retardant antistatic protective clothing., The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a fullface particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection,use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN(EU).
