Replace contaminated clothing. Wash your hands after using this substance.

Personal protective equipment

Eye/face protection

Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Gloves must be checked before use. Remove the gloves in the correct way (do not touch the outer surface of the gloves) and avoid any skin contact with the appliance. After use, carefully operate contaminated gloves in accordance with relevant laws and regulations and valid laboratory procedures and procedures. Clean and blow-dry the protective gloves selected for your hand and must comply with the specifications set out in Regulation (EU) 2016/425 and the resulting en 374 standard.

Body Protection

Anti-penetration clothing, flame retardant anti-static protective clothing, the type of protective equipment must be selected according to the concentration and content of hazardous substances in a particular workplace.

Respiratory protection

required when dusts are generated.

Our recommendations on filtering respiratory protection are based on the following standards: DIN EN 143, DIN 14387 and other accompanying standards relating to the used respiratory protection system.

Recommended Filter type: Filter type P1

The entrepreneur has to ensure that maintenance, cleaning and testing of respiratory protective devices are carried out according to the instructions of the producer.

These measures have to be properly documented.

Control of environmental exposure

Do not let product enter drains.
