Appropriate engineering controls

Operate according to industrial hygiene and safe use rules. Wash hands before rest and at the end of work.

Personal protective equipment

Eye/face protection

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Gloves must be checked before use. Please use the correct method to remove gloves (do not touch the outer surface of gloves), and avoid any skin parts from touching the product. After use, please handle contaminated gloves carefully according to relevant laws and regulations and effective laboratory rules and procedures.

Please clean and blow dry the protective gloves selected for your hands, which must conform to the specifications given in regulation (EU)2016/425 and the en 374 standard derived therefrom.

Body Protection

Impervious clothing, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

If the risk assessment shows that air-purifying gas masks are needed, please use full-face multi-function gas masks (US) or ABEK type (EN 14387) gas masks as candidates for engineering control. If the gas mask is the only way to protect it, use a full-face air supply gas mask. Respirators use respirators and parts that have been tested and passed government standards such as NIOSH(US) or CEN(EU).

Control of environmental exposure

If safety requires, prevent further leakage or spillage. Do not let the product enter the sewer.
