SECTION 4: First aid measures

4.1 Description of first aid measures

General advice

Consult a doctor. Present this safety technical manual to the on-site doctor.

If inhaled

If inhaled, please move the patient to fresh air. If breathing stops, perform artificial respiration. Consult a doctor.

In case of skin contact

Rinse with soap and plenty of water. Consult a doctor.

In case of eye contact

Thoroughly rinse with plenty of water for at least 15 minutes and consult a doctor.

If swallowed

Do not feed anything to unconscious individuals through the mouth. Rinse your mouth with water. Consult a doctor.

4.2 Most important symptoms and effects, both acute and delayed

Do not feed anything to unconscious individuals through the mouth. Rinse your mouth with water. Consult a doctor.

4.3 Indication of any immediate medical attention and special treatment needed

Inhalation in the human body causes the formation of methemoglobin, which can lead to pallor disease at a certain concentration. Generally, the onset occurs 2-4 hours or longer, and to our knowledge, the chemical, physical, and toxic properties have not been fully studied.

SECTION 5: Firefighting measures

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a fullface respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
