General advice

no data available

If inhaled

Move the victim to fresh air, maintain clear breathing, and rest. If you feel unwell, please seek medical attention.

In case of skin contact

Immediately remove/remove all contaminated clothing. Gently wash with plenty of soap and water. If skin irritation or rash occurs: seek medical attention.

In case of eye contact

Wash with water carefully for a few minutes. If convenient and easy to operate, remove contact lenses. Continue cleaning. If eye irritation: seek medical attention/medical attention.

If swallowed

If feeling unwell, seek medical attention. Rinse your mouth.

4.2 Most important symptoms and effects, both acute and delayed

4.3 Indication of any immediate medical attention and special treatment needed

no data available

SECTION 5: Firefighting measures**5.1 Extinguishing media****Suitable extinguishing media**

no data available

Unsuitable extinguishing media

no data available

5.2 Special hazards arising from the substance or mixture

no data available

5.3 Advice for firefighters

If necessary, wear a self-contained breathing apparatus to put out the fire.

5.4 Further information

Water spray can be used to cool unopened containers.

SECTION 6: Accidental release measures**6.1 Personal precautions, protective equipment and emergency procedures**

Use special personal protective equipment (self-contained breathing apparatus). Stay away from spills/leaks and keep upwind. Ensure sufficient ventilation. The leakage area should be enclosed with safety belts and other measures to control the entry of unrelated personnel.

6.2 Environmental precautions

Prevent entry into the sewer.

6.3 Methods and materials for containment and cleaning up

Absorb the leaked material with dry sand or inert absorbent before recycling into a sealed container. Once a large amount of leakage occurs, build embankments to control it. Attached or collected materials should be disposed of in accordance with relevant laws and regulations.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Handle in a well ventilated area. Wear appropriate protective gear. Do not cause leakage, spillage, or dispersion. Do not generate unnecessary vapors. Stay away from heat sources/sparks/open flames/hot surfaces. No smoking. Take measures to prevent static electricity accumulation. Use explosion-proof equipment. Avoid impact and friction. Thoroughly clean hands and face after treatment. If possible, use a closed system. If steam or aerosols are generated, use ventilation and local exhaust.

7.2 Conditions for safe storage, including any incompatibilities

Keep the container sealed. Storing in a cool, dark, and well ventilated place is beneficial. Store in an inert gas environment. Ensure that the container is not affected by unexpected factors such as falling or falling off. Keep away from incompatible materials such as oxidants for storage. Air & light sensitive, Fill with argon and store in the dark.

7.3 Specific end use(s)

no data available

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN166(EU).

Skin protection

Gloves must be checked before use. Please use proper methods to remove the gloves (do not touch the outer surface of the gloves), and avoid any skin parts contacting the product. After use, please handle the contaminated gloves carefully according to relevant laws and regulations and effective laboratory rules and procedures. Please

clean and blow dry the protective gloves selected for your hands must meet the specifications given in regulation (EU) 2016 / 425 and the en 374 standard derived from it.

Body Protection

Complete suit protecting against chemicals, Flame retardant antistatic protective clothing., The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a fullface respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
