SECTION 4: First aid measures

4.1 Description of first aid measures

General advice
 no data available
 If inhaled
 If inhaled, please move the patient to fresh air. If breathing stops, give artificial respiration.
 In case of skin contact
 Rinse with soap and plenty of water. Consult a doctor.
 In case of eye contact
 In case of eye contact, rinse thoroughly with plenty of water for at least 15 minutes and consult a doctor.
 If swallowed
 Do not feed anything from the mouth to an unconscious person. Rinse your mouth with water.

4.2 Most important symptoms and effects, both acute and delayed

High concentrations of lithium ions can cause dizziness and collapse, and limited sodium intake can cause kidney damage. Dehydration, weightlessness, skin effects, and thyroid dysfunction have all been reported. Possible central nervous system effects include aphasia, blurred vision, sensory loss, seizures, etc. Repeated exposure to lithium ions can cause diarrhea, vomiting, and neuromuscular effects such as tremors, cramps, and hyperreflexia. Long term exposure to iodine may lead to iodine poisoning in sensitive populations Symptoms after contact include rash, run nose, headache, and mucosal irritation In severe cases, the skin may develop papules, boils, measures, blisters, and blue spots Iode easily passes through the platform Thyroid switching has also been reported to cause breathing difficulties and lead to neural death It is known that iodide causes drunk fed, which commonly last for a short period of time

8.1 Control parameters

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN166(EU).

Skin protection

Gloves must be checked before use. Please use proper methods to remove the gloves (do not touch the outer surface of the gloves), and avoid any skin parts contacting the product. After use, please handle the contaminated gloves carefully according to relevant laws and regulations and effective laboratory rules and procedures. Please clean and blow dry the protective gloves selected for your hands must meet the specifications given in regulation (EU) 2016 / 425 and the en 374 standard derived from it.

Body Protection

Complete suit protecting against chemicals, Flame retardant antistatic protective clothing., The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a fullface respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
