glove's outer surface) to avoid skin contact with this product.Dispose of contaminated gloves after use in

accordance with applicable laws and good laboratory practices.Wash and dry hands.

Body Protection

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the

concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-
purpose
combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering
controls.If the
respirator is the sole means of protection, use a full-face supplied air respirator.Use
respirators and components
tested and approved under appropriate government standards such as NIOSH
(US) or CEN (EU).
