7.1 Precautions for safe handling

Operators should receive specialized training and strictly follow operating procedures. The operation and disposal should be carried out in places with local ventilation or comprehensive ventilation facilities. Avoid contact between eyes and skin, and avoid inhaling vapors. See Part 8 for individual protective measures. Keep away from sources of fire and heat, and smoking is strictly prohibited in the workplace. Use explosion-proof ventilation systems and equipment. If canning is required, the flow rate should be controlled and there should be a grounding device to prevent static electricity accumulation. Avoid contact with prohibited compounds such as oxidants (see Part 10 for prohibited compounds). Handle with care during transportation to prevent damage to packaging and containers. Empty containers may contain residual harmful substances. Wash hands after use and prohibit eating or drinking in the workplace. Equip with corresponding types and quantities of fire-fighting equipment and emergency response equipment for leaks.

7.2 Conditions for safe storage, including any incompatibilities

Sensitive to air, store with argon filling.

7.3 Specific end use(s)

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

8.2 Exposure controls

Appropriate engineering controls

Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product.

Personal protective equipment

Eye/face protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching gloves outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Body Protection

The type of waterproof clothing, flame-retardant and anti-static protective clothing, and protective equipment must be selected based on the concentration and content of hazardous substances in the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-

purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
