SECTION 8: Exposure controls/personal protection

8.1 Control parameters

8.2 Exposure controls

Appropriate engineering controls

Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product.

Personal protective equipment

Eye/face protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate
 government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching
 glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in
 accordance with applicable laws and good laboratory practices. Wash and dry hands.

Body Protection

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the
 concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose
 combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the
 respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components
 tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
