offering an approval for any specific use scenario.

Body Protection

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the
concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type

N99
(US) or type P2 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is

the sole
means of protection, use a full-face supplied air respirator. Use respirators and components

tested and approved
under appropriate government standards such as NIOSH (US) or CEN (EU).
