SECTION 4: First aid measures

4.1 Description of first aid measures

General advice

Show this safety data sheet to the doctor on site. Immediate treatment is required.

If inhaled

If breathing stops, give artificial respiration. Leave the exposed area and lie down. If the patient ingests or inhales the

substance, do not use the mouth-to-mouth method; use a pocket mask equipped with a one-way valve or other appropriate respiratory medical device Artificial respiration. Call a doctor immediately.

In case of skin contact

Rinse immediately with plenty of water for at least 15 minutes. Remove and wash contaminated clothes and gloves, including the inside, before reuse. Call a doctor immediately.

In case of eye contact

Rinse immediately with plenty of water for at least 15 minutes, including under the eyelids. Immediate treatment is required.

If swallowed

Do not induce vomiting. Clean the mouth with water. Do not feed anything through the mouth to an unconscious victim. Call a doctor immediately.

4.2 Most important symptoms and effects, both acute and delayed

All routes of exposure can cause burns. The product is a corrosive substance. The use of gastric lavage or vomiting is contraindicated. The possibility of perforation of the stomach or esophagus should be investigated. : Ingestion can cause severe edema, serious damage to fragile tissues, and danger of perforation

4.3 Indication of any immediate medical attention and special treatment needed

no data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Water, Foam, Carbon dioxide (CO₂), Dry powder

Unsuitable extinguishing media

no data available

5.2 Special hazards arising from the substance or mixture

Thermal decomposition can cause the release of irritating gases and vapors. This product can cause burns to the eyes, skin and mucous membranes.

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

Use water spray to cool unopened containers.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation. Use required personal protective equipment. Evacuate personnel to a safe area. Personnel must stay away from overflow/leakage areas, or be at upwind.

6.2 Environmental precautions

ALADDIN SCIENTIFIC CORPORATION

14078 Meridian Parkway, Riverside, CA. 92518

Must not be discharged into the environment. See section 12 for additional ecological information.

6.3 Methods and materials for containment and cleaning up

Absorb with inert absorbent material. Store in a suitable airtight container for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Wear personal protective equipment/face protection. Take care to prevent getting into eyes, contact with skin or clothing. Use only in chemical exhaust hoods. Do not breathe fumes/vapors/spray. Do not ingest. Seek medical assistance immediately if swallowed

7.2 Conditions for safe storage, including any incompatibilities

Corrosive areas. Keep the container tightly closed and put it in a dry, cool and well-ventilated place. Fill it with argon and store it, which is sensitive to air.

7.3 Specific end use(s)

no data available

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN166(EU).

Skin protection

Gloves must be checked before use. Please use proper methods to remove the gloves (do not touch the outer surface of the gloves), and avoid any skin parts contacting the product. After use, please handle the contaminated gloves carefully according to relevant laws and regulations and effective laboratory rules and procedures. Please clean and blow dry the protective gloves selected for your hands must meet the specifications given in regulation (EU) 2016 / 425 and the en 374 standard derived from it.

Body Protection

Complete suit protecting against chemicals, Flame retardant antistatic protective clothing., The type of

protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a fullface respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.
