## SECTION 8: Exposure controls/personal protection

### 8.1 Control parameters

### 8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash your hands before breaks and at the end of work.

Personal protective equipment

Eye/face protection

For face shields and safety glasses, please use equipment that has been tested and approved by official standards such as NIOSH (US) or EN 166 (EU) for eye protection.

Skin protection

Gloves must be inspected prior to use. Please use the correct method to remove the gloves (do not touch the outer surface of the gloves), and avoid any skin parts contacting the product. After use, please handle contaminated gloves carefully in accordance with relevant laws and regulations and effective laboratory procedures and procedures. Please clean and blow dry the protective gloves selected for your hands, which must comply with the specifications given in Regulation (EU) 2016/425 and the en 374 standard derived therefrom.

Body Protection

Impermeable clothing, flame-retardant and anti-static protective clothing, and the type of protective equipment must be selected according to the concentration and content of the dangerous substance in the specific workplace.

Respiratory protection

If the risk assessment shows that a gas mask with air purification is required, please use a full-face multifunctional gas mask (US) or ABEK type (EN 14387) gas mask tube as a substitute for engineering control. If a gas mask is the only way of protection, use a full-face air-supply gas mask. Respirators use respirators and parts that have been tested and passed government standards such as NIOSH (US) or CEN (EU).
