SECTION 4: First aid measures

4.1 Description of first aid measures

General advice

If symptoms persist, contact a physician.

If inhaled

Transfer to fresh air. If breathing stops, give mouth-to-mouth. If symptoms develop, seek medical attention. The risk of serious lung damage, ie through inhalation.

In case of skin contact

Flush immediately with plenty of water for at least 15 minutes. Contact your physician if skin irritation persists.

In case of eye contact

Immediately flush with plenty of water for at least 15 minutes, including under the eyelids. See a doctor for treatment.

If swallowed

Rinse your mouth with water, then drink plenty of water. Do not induce vomiting. Call a doctor or a detoxification centre immediately. If vomiting occurs naturally, tilt the patient forward.

4.2 Most important symptoms and effects, both acute and delayed

It's hard to breathe. Symptoms of overexposure may be headache, dizziness, fatigue, nausea and vomiting

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN166(EU).

Skin protection

Gloves must be checked before use. Please use proper methods to remove the gloves (do not touch the outer surface of the gloves), and avoid any skin parts contacting the product. After use, please handle the contaminated gloves carefully according to relevant laws and regulations and effective laboratory rules and procedures. Please clean and blow dry the protective gloves selected for your hands must meet the specifications given in regulation (EU) 2016 / 425 and the en 374 standard derived from it.

Body Protection

Complete suit protecting against chemicals, Flame retardant antistatic protective clothing., The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a fullface respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.
