## Specification Sheet

|                          |                                         |
|--------------------------|-----------------------------------------|
| Product Name:            | <b>Ammonium hexachloropalladate(IV)</b> |
| Specifications & Purity: | ≥99.9% metals basis, Pd 29%             |
| SKU #                    | <b>A109266</b>                          |

| Parameter                              | Limit Values                                      |
|----------------------------------------|---------------------------------------------------|
| Pd by ICP Atomic emission              | 29-31 (%)                                         |
| Purity(Based On Trace Metals Analysis) | 99.9-100 (%)                                      |
| Nitrogen by Elemental Analysis         | 7.9-8.5 (%)                                       |
| Total Metallic Impuritie               | 0-2000 (ppm)                                      |
| Appearance (A109266)                   | Orange to Red Powder,Solid,Crystals and/or Chunks |
