## Specification Sheet

|                          |                              |
|--------------------------|------------------------------|
| Product Name:            | <b>1-Acetamidoadamantane</b> |
| Specifications & Purity: | >98.0%                       |
| SKU #                    | <b>A151178</b>               |

| Parameter           | Limit Values                                |
|---------------------|---------------------------------------------|
| Melting point       | 147-151 (°C)                                |
| Purity(GC)          | 98-100 (%)                                  |
| Proton NMR spectrum | Conforms to Structure                       |
| Appearance(A151178) | White to Yellow to Orange powder to crystal |
