## Specification Sheet

|                          |                                                                               |
|--------------------------|-------------------------------------------------------------------------------|
| Product Name:            | <b>2-Amino-3-(2-oxo-1,2-dihydroquinolin-4-yl)propanoic Acid Hydrochloride</b> |
| Specifications & Purity: | ≥95%                                                                          |
| SKU #                    | <b>A184740</b>                                                                |

| Parameter                               | Limit Values          |
|-----------------------------------------|-----------------------|
| Purity(HPLC)                            | 95-100 (%)            |
| Purity(Titration by AgNO <sub>3</sub> ) | 94.5-105.5 (%)        |
| Appearance (A184740)                    | White powder          |
| Proton NMR spectrum                     | Conforms to Structure |
