## Specification Sheet

|                          |                                                                               |
|--------------------------|-------------------------------------------------------------------------------|
| Product Name:            | <b>3-Acrylamidophenylboronic Acid (contains varying amounts of Anhydride)</b> |
| Specifications & Purity: | ≥97%                                                                          |
| SKU #                    | <b>A188951</b>                                                                |

| Parameter            | Limit Values                                       |
|----------------------|----------------------------------------------------|
| Purity(HPLC)         | 97-100 (%)                                         |
| Appearance (A188951) | white to light brown to beige powder crystal solid |
| Proton NMR spectrum  | Conforms to Structure                              |
