## Specification Sheet

|                     |                                                     |
|---------------------|-----------------------------------------------------|
| Product Name:       | LSR Mouse mAb                                       |
| SKU #:              | Ab113676                                            |
| Version:            | 1                                                   |
| Clone ID:           | C2                                                  |
| Isotype:            | Mouse IgG1                                          |
| Source:             | Hybridoma supernatant                               |
| Formulation:        | Liquid                                              |
| Concentration:      | See COA                                             |
| Buffer Solution:    | 10mM PBS, 50% Glycerol, 0.05% Proclin 300, pH 7.4   |
| Storage Conditions: | Store at -20°C, Avoid repeated freezing and thawing |

| Parameter               | Limit Values      |
|-------------------------|-------------------|
| Appearance(Ab113676)    | Colourless liquid |
| Target band MW in WB    | 63.9-78.1(kD)     |
| Non-specific band in WB | Conform           |
| IHC                     | Conform           |
