## Specification Sheet

|                          |                                                                  |
|--------------------------|------------------------------------------------------------------|
| Product Name:            | <b>3-Biphenylboroni (ccontains varying amounts of Anhydride)</b> |
| Specifications & Purity: | 98%                                                              |
| SKU #                    | <b>B101971</b>                                                   |

| Parameter            | Limit Values                                                     |
|----------------------|------------------------------------------------------------------|
| Purity(HPLC)         | 98-100 (%)                                                       |
| Melting point        | 206-211 (°C)                                                     |
| Appearance (B101971) | White to Off-white to Orange to Brown Crystal to Powder to Solid |
| Proton NMR spectrum  | Conforms to Structure                                            |
