

## Specification Sheet

|                          |                                              |
|--------------------------|----------------------------------------------|
| Product Name:            | <b>Boc-2-chloro-L-beta-homophenylalanine</b> |
| Specifications & Purity: | 98%                                          |
| SKU #                    | <b>B356199</b>                               |

| Parameter                                                | Limit Values                         |
|----------------------------------------------------------|--------------------------------------|
| Appearance (B356199)                                     | White to off white powder to crystal |
| Purity(HPLC)                                             | 98-100 (%)                           |
| Specific rotation $[\alpha]_{20/D}(C=1, \text{Ethanol})$ | -46--43 (°)                          |
| Proton NMR spectrum                                      | Conforms to structure                |
