

## Specification Sheet

|                          |                                          |
|--------------------------|------------------------------------------|
| Product Name:            | <b>cis-1,2,3,6-Tetrahydrophthalimide</b> |
| Specifications & Purity: | 96%                                      |
| SKU #                    | <b>C101947</b>                           |

| Parameter                        | Limit Values                              |
|----------------------------------|-------------------------------------------|
| Melting point                    | 131-138 (°C)                              |
| Purity(Neutralization titration) | 95.5-100 (%)                              |
| Appearance (C101947)             | Yellow to Brown Powder,Crystals or Flakes |
| Infrared spectrum                | Conforms to Structure                     |
