## Specification Sheet

|                          |                                                                                               |
|--------------------------|-----------------------------------------------------------------------------------------------|
| Product Name:            | <b>2-Chloro-4-(trifluoromethyl)benzeneboronic acid(contains varying amounts of Anhydride)</b> |
| Specifications & Purity: | 96%                                                                                           |
| SKU #                    | <b>C102577</b>                                                                                |

| Parameter            | Limit Values          |
|----------------------|-----------------------|
| Melting point        | 110-112 (°C)          |
| Purity(HPLC)         | 96-100 (%)            |
| Appearance (C102577) | White crystals        |
| Proton NMR spectrum  | Conforms to Structure |
