## Specification Sheet

|                          |                                                 |
|--------------------------|-------------------------------------------------|
| Product Name:            | <b>6-Chloro-3,4-dihydro-2(1H)-naphthalenone</b> |
| Specifications & Purity: | ≥94%                                            |
| SKU #                    | <b>C119737</b>                                  |

| Parameter                | Limit Values                                        |
|--------------------------|-----------------------------------------------------|
| Appearance (C119737)     | White to light orange powder, crystals and/or chunk |
| Proton NMR spectrum      | Conforms to Structure                               |
| Purity(HPLC)             | 95-100 (%)                                          |
| LC-MS for identification | Conforms                                            |
