

## Specification Sheet

|                          |                                               |
|--------------------------|-----------------------------------------------|
| Product Name:            | <b>2-Chloro-5-methyl-1,4-phenylenediamine</b> |
| Specifications & Purity: | ≥98%                                          |
| SKU #                    | <b>C136364</b>                                |

| Parameter            | Limit Values                                      |
|----------------------|---------------------------------------------------|
| Purity(GC)           | 98-100 (%)                                        |
| Melting point        | 146-149 (°C)                                      |
| Appearance (C136364) | White to Yellow to Brown Powder,Crystals or Solid |
| Infrared spectrum    | Conforms to Structure                             |
| Proton NMR spectrum  | Conforms to Structure                             |
