

## Specification Sheet

|                          |                                      |
|--------------------------|--------------------------------------|
| Product Name:            | <b>5-Cyano-2-methoxybenzaldehyde</b> |
| Specifications & Purity: | ≥98%                                 |
| SKU #                    | <b>C468957</b>                       |

| Parameter           | Limit Values                       |
|---------------------|------------------------------------|
| Appearance(C468957) | White to Yellow Powder or Crystals |
| Melting point       | 115-120 (°C)                       |
| Proton NMR spectrum | Conforms to Structure              |
| Purity(HPLC area)   | 98-100 (%)                         |
