## Specification Sheet

|                          |                                                              |
|--------------------------|--------------------------------------------------------------|
| Product Name:            | <b>Dibutyl Vinylboronate (stabilized with Phenothiazine)</b> |
| Specifications & Purity: | ≥94%(GC)                                                     |
| SKU #                    | <b>D155385</b>                                               |

| Parameter                          | Limit Values          |
|------------------------------------|-----------------------|
| Density (20°C)                     | 0.836-0.842           |
| Purity(GC)                         | 94-100 (%)            |
| Refractive index n <sub>20/D</sub> | 1.417-1.421           |
| Proton NMR spectrum                | Conforms to Structure |
