## Specification Sheet

|                          |                                                                                           |
|--------------------------|-------------------------------------------------------------------------------------------|
| Product Name:            | [4-(Diethylcarbamoyl)-2-methoxy]phenylboronic acid(contains varying amounts of Anhydride) |
| Specifications & Purity: | 97%                                                                                       |
| SKU #                    | D188080                                                                                   |

| Parameter            | Limit Values          |
|----------------------|-----------------------|
| Purity(HPLC)         | 97-100 (%)            |
| Appearance (D188080) | White to Yellow Solid |
| Proton NMR spectrum  | Conforms to Structure |
