

## Specification Sheet

|                          |                                                                         |
|--------------------------|-------------------------------------------------------------------------|
| Product Name:            | <b>Ethynyl(phenyl)iodonium Tetrafluoroborate [Ethynylating Reagent]</b> |
| Specifications & Purity: | <b>≥97%</b>                                                             |
| SKU #                    | <b>E156142</b>                                                          |

| Parameter                       | Limit Values                                |
|---------------------------------|---------------------------------------------|
| Proton NMR spectrum             | Conforms to Structure                       |
| Purity(Potassium iodate Method) | 97-102.5 (%)                                |
| Appearance(E156142)             | White to Yellow to Orange powder to crystal |
