## Specification Sheet

Product Name: **Fish oil**  
Specifications & Purity: **USP, Ph.Eur.**  
SKU #: **F1456055**

| Parameter                                                                                                  | Limit Values                  |
|------------------------------------------------------------------------------------------------------------|-------------------------------|
| Appearance(F1456055)                                                                                       | Light yellow to yellow liquid |
| EPA(expressed as triglycerides)                                                                            | ≥13 (%)                       |
| DHA(expressed as triglycerides)                                                                            | ≥9 (%)                        |
| Total omega-3 acids(expressed as triglycerides)                                                            | ≥28 (%)                       |
| Acid Value                                                                                                 | 0-0.5 (mgKOH/g)               |
| Anisidine value                                                                                            | 0-20                          |
| Peroxide value                                                                                             | 0-5 (meq/kg)                  |
| Total oxidation value                                                                                      | 0-26                          |
| Unsaponifiable Matter                                                                                      | 0-1.5 (%)                     |
| Stearin(0°C,3h)                                                                                            | Clear                         |
| Oligomers(50mg in 10ml THF)                                                                                | No residue                    |
| Absorbance(233nm):0.3g in 50ml trimethylpentane. Dilute 2 ml of the solution to 50ml with trimethylpentane | 0-0.7                         |
