

## Specification Sheet

|                          |                                                                               |
|--------------------------|-------------------------------------------------------------------------------|
| Product Name:            | <b>Standard substance for analysis of iodine ion (I<sup>-</sup>) in water</b> |
| Specifications & Purity: | 1000µg/ml in Water (20°C)                                                     |
| SKU #                    | <b>I301094</b>                                                                |

| Parameter            | Limit Values                  |
|----------------------|-------------------------------|
| Concentration        | 980-1020 (µg/ml)              |
| Appearance (I301094) | Colorless, transparent liquid |
