

## Specification Sheet

|                          |                                                                               |
|--------------------------|-------------------------------------------------------------------------------|
| Product Name:            | <b>Standard substance for analysis of iodine ion (I<sup>-</sup>) in water</b> |
| Specifications & Purity: | 100µg/ml in Water (20°C)                                                      |
| SKU #                    | <b>I301095</b>                                                                |

| Parameter            | Limit Values                  |
|----------------------|-------------------------------|
| Concentration        | 98-102 (µg/ml)                |
| Appearance (I301095) | Colorless, transparent liquid |
