## Specification Sheet

|                          |                                            |
|--------------------------|--------------------------------------------|
| Product Name:            | <b>6-Methoxypyridine-2-carboxylic acid</b> |
| Specifications & Purity: | 98%                                        |
| SKU #                    | <b>M133345</b>                             |

| Parameter                  | Limit Values                                      |
|----------------------------|---------------------------------------------------|
| Melting point              | 132-136 (°C)                                      |
| Purity (Titration by NaOH) | 97.5-102.5 (%)                                    |
| Appearance (M133345)       | white to off-white powder, crystals and/or chunks |
| Proton NMR spectrum        | Conforms to Structure                             |
| Purity(HPLC area)          | 98-100 (%)                                        |
