## Specification Sheet

|                          |                                                                                 |
|--------------------------|---------------------------------------------------------------------------------|
| Product Name:            | <b>Microcrystalline alumina spheres</b>                                         |
| Specifications & Purity: | Used for grinding media, $\text{Al}_2\text{O}_3 \geq 95\%$ , Particle size 60mm |
| SKU #                    | <b>M1507034</b>                                                                 |

| Parameter                         | Limit Values  |
|-----------------------------------|---------------|
| Appearance(M1507034)              | White Solid   |
| Purity( $\text{Al}_2\text{O}_3$ ) | $\geq 95$ (%) |
| Particle size                     | 50-70 (mm)    |
