

## Specification Sheet

|                          |                                               |
|--------------------------|-----------------------------------------------|
| Product Name:            | <b>Methyl 6-methoxypyridine-2-carboxylate</b> |
| Specifications & Purity: | 97%                                           |
| SKU #                    | <b>M169135</b>                                |

| Parameter            | Limit Values                                      |
|----------------------|---------------------------------------------------|
| Purity(GC)           | 97-100 (%)                                        |
| Melting point        | 33-38 (°C)                                        |
| Appearance (M169135) | white to tan solid powder and/or chunks or liquid |
| Proton NMR spectrum  | Conforms to Structure                             |
