## Specification Sheet

|                          |                                 |
|--------------------------|---------------------------------|
| Product Name:            | <b>Methyl 4-Tolyl Sulfoxide</b> |
| Specifications & Purity: | ≥98%                            |
| SKU #                    | <b>M304998</b>                  |

| Parameter           | Limit Values                                                            |
|---------------------|-------------------------------------------------------------------------|
| Melting point       | 37-47 (°C)                                                              |
| Purity(GC)          | 98-100 (%)                                                              |
| NMR Spectrum 1H     | Conforms to Structure                                                   |
| Appearance(M304998) | White to Almost white to Yellow Solid, Powder or Crystals and/or Chunks |
