

## Specification Sheet

|                          |                                            |
|--------------------------|--------------------------------------------|
| Product Name:            | <b>2-Nitro-4-(trifluoromethoxy)aniline</b> |
| Specifications & Purity: | 98%                                        |
| SKU #                    | <b>N121019</b>                             |

| Parameter            | Limit Values                                     |
|----------------------|--------------------------------------------------|
| Purity(GC)           | 98-100 (%)                                       |
| Melting point        | 61-65 (°C)                                       |
| Appearance (N121019) | White to Tan or Yellow Crystals, Powder or Solid |
| Proton NMR spectrum  | Conforms to structure                            |
