

## Specification Sheet

|                          |                                               |
|--------------------------|-----------------------------------------------|
| Product Name:            | <b>5-Nitroisophthalic Acid Dimethyl Ester</b> |
| Specifications & Purity: | 98%                                           |
| SKU #                    | <b>N124670</b>                                |

| Parameter             | Limit Values                                  |
|-----------------------|-----------------------------------------------|
| Purity(GC)            | 98-100 (%)                                    |
| Melting point         | 123-126 (°C)                                  |
| Appearance (N124670)  | White to Off-White Solid, Powder, or Crystals |
| Infrared spectrum     | Conforms to Structure                         |
| Solubility in Toluene | almost transparency                           |
