## Specification Sheet

|                          |                                    |
|--------------------------|------------------------------------|
| Product Name:            | <b>2 , 3-Naphthalenedimethanol</b> |
| Specifications & Purity: | <b>≥96%</b>                        |
| SKU #                    | <b>N133794</b>                     |

| Parameter            | Limit Values                               |
|----------------------|--------------------------------------------|
| Appearance (N133794) | White to Orange to Green powder to crystal |
| Purity(HPLC)         | 96-100 (%)                                 |
| Melting point        | 157-161 (°C)                               |
| Proton NMR spectrum  | Conforms to structure                      |
