

## Specification Sheet

|                          |                                                                     |
|--------------------------|---------------------------------------------------------------------|
| Product Name:            | <b>N-Methyl-4-nitro-N-[2-(4-nitrophenoxy)ethyl]phenylethylamine</b> |
| Specifications & Purity: | <b>≥97.0%</b>                                                       |
| SKU #                    | <b>N138058</b>                                                      |

| Parameter            | Limit Values                                      |
|----------------------|---------------------------------------------------|
| Purity(HPLC)         | 97-100 (%)                                        |
| Melting point        | 70-74 (°C)                                        |
| Appearance (N138058) | Pale Yellow to Pale Reddish Yellow Crystal,Powder |
| Proton NMR spectrum  | Conforms to Structure                             |
