

## Specification Sheet

|                          |                                       |
|--------------------------|---------------------------------------|
| Product Name:            | <b>N-(4-Fluorobenzylidene)aniline</b> |
| Specifications & Purity: | 98%                                   |
| SKU #                    | <b>N159234</b>                        |

| Parameter            | Limit Values                            |
|----------------------|-----------------------------------------|
| Appearance (N159234) | White to Light yellow powder to crystal |
| Purity(GC)           | 98-100 (%)                              |
| Melting point        | 42-46 (°C)                              |
| Proton NMR spectrum  | Conforms to structure                   |
