## Specification Sheet

|                          |                                                                 |
|--------------------------|-----------------------------------------------------------------|
| Product Name:            | <b>N-[3-[3-(Dimethylamino)acryloyl]phenyl]-N-ethylacetamide</b> |
| Specifications & Purity: | ≥98%                                                            |
| SKU #                    | <b>N159304</b>                                                  |

| Parameter            | Limit Values                                       |
|----------------------|----------------------------------------------------|
| Melting point        | 111-115 (°C)                                       |
| Purity(HPLC)         | 98-100 (%)                                         |
| Appearance (N159304) | light orange to yellow to green powder to crystals |
| Proton NMR spectrum  | Conforms to Structure                              |
