## Specification Sheet

|                          |                                                               |
|--------------------------|---------------------------------------------------------------|
| Product Name:            | Neopentylboronic acid (contains varying amounts of Anhydride) |
| Specifications & Purity: | >96%                                                          |
| SKU #                    | N290783                                                       |

| Parameter                | Limit Values                                                         |
|--------------------------|----------------------------------------------------------------------|
| Assay(Titration by NaOH) | 96-102.5 (%)                                                         |
| Appearance(N290783)      | White to Yellow and Faint Beige to Beige Powder or Crystal or Chunks |
| Proton NMR spectrum      | Conforms to Structure                                                |
