## Specification Sheet

|                          |                                                                                         |
|--------------------------|-----------------------------------------------------------------------------------------|
| Product Name:            | <b>Standard material for analysis of bromate (BrO<sub>3</sub><sup>-</sup>) in water</b> |
| Specifications & Purity: | 100µg/ml in Water (20°C)                                                                |
| SKU #                    | <b>P301464</b>                                                                          |

| Parameter            | Limit Values                  |
|----------------------|-------------------------------|
| Concentration        | 98-102 (µg/ml)                |
| Appearance (P301464) | Colorless, transparent liquid |
