## Specification Sheet

|                          |                                                                                                                     |
|--------------------------|---------------------------------------------------------------------------------------------------------------------|
| Product Name:            | <b>Pepsin</b>                                                                                                       |
| Specifications & Purity: | Bioactive,ActiBioPure™,Native,High Performance,EnzymoPure™,from Porcine stomach mucose; ≥15000NF.U/mg enzyme powder |
| SKU #                    | <b>P651994</b>                                                                                                      |

| Parameter                                 | Limit Values                    |
|-------------------------------------------|---------------------------------|
| Appearance(P651994)                       | White or slightly yellow Powder |
| Protease activity                         | ≥15000 (units/mg)               |
| drying Loss(at 60°C , 4 hours and vacuum) | < 5 (%)                         |
| Total Bacteria Count                      | ≤10000 (cfu/g)                  |
| Molds and yeasts                          | 0-100 (cfu/g)                   |
| E.coli                                    | Not detected                    |
| Salmonellae                               | Not detected                    |
