

ALADDIN SCIENTIFIC CORPORATION

14078 Meridian Parkway, Riverside, CA. 92518

## Specification Sheet

Product Name: **2,2':6',2''-Terpyridine**  
Specifications & Purity: **≥98%**  
SKU #: **T100693**

| Parameter                   | Limit Values                                                                                                       |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------|
| Purity(NonaqueousTitration) | 97.5-102.5 (%)                                                                                                     |
| Purity(GC)                  | 98-100 (%)                                                                                                         |
| Melting point               | 91-95 (°C)                                                                                                         |
| Appearance (T100693)        | Light Yellow to Yellow and Light Green-Yellow to Green-Yellow and Yellow-Green and Yellow-Brown Powder or Crystals |
| Infrared spectrum           | Conforms to Structure                                                                                              |
