## Specification Sheet

|                          |                                                      |
|--------------------------|------------------------------------------------------|
| Product Name:            | <b>Ti3C2Tx (MXene) multilayer Nanoflake</b>          |
| Specifications & Purity: | Thickness: 100-200nm, purity: approximately 54-68wt% |
| SKU #                    | <b>T1520652</b>                                      |

| Parameter            | Limit Values          |
|----------------------|-----------------------|
| Appearance(T1520652) | Black powder          |
| Purity               | 54-68 (%)             |
| X-Ray Diffraction    | Conforms to Structure |
| Thickness            | 100-200 (nm)          |
